

# The China Lab Guide to Megablock Urbanisms

中国实验室  
指南：  
超级街区  
城市主义

Publication Introduction  
出版简介

**China Lab invites contributors to join us in collectively exploring the phenomenon of large-scale development in China and beyond.**

Superblocks are the basic unit of China's urban development, but they are also spatial instruments with social, cultural, environmental, and economic implications, operating between the scales of architecture and the city. These redefined 'Megablocks' then become laboratories for the consequences, opportunities, and potential global proliferation of Chinese urban models, reconsidered through the filters of ecology, economics, and ethics.

In the bi-lingual Guide to Megablock Urbanisms, China Lab aims to document and advance a wider conversation on the policies and collective experiences of large-scale development that are shaping China's urban future.

中国实验室诚邀社会各界人士与我们一起探讨有关中国的大型城市发展项目及其背后的意义。

“超级街区”是中国现代城市的基本单位。它是一种特定的城市空间载体，在社会，环境，文化及经济层面上都有着特殊的含义。其系统在建筑尺度和城市尺度之间运作。如果我们重新审视过往对环境、经济及道德的理解，并视“超级街区”这一概念为“实验室”，这将助我们进一步研究中国城市模型的价值、未来的机会和其概念蔓延的可能性。

在这本双语发行的“超级城区指南”中，我们旨在发起及记录有关对中国大型城市发展这一课题——包括在社会制度或日常生活等层面上——的讨论与对话。
